Fabric for upholstered seats:
COM (Customer's Own Material)
fabric required (chair and barstool):
.36 yd (.33 m)

Note: This is the estimated amount based on 54" (137 cm) wide material. The actual amount required may vary depending on special pattern matching and the width of the material.

Cushion Foam: High density foam on seat

Wood:

Species: 100% Solid European Beech Hardwood

Construction:

Joints: Mortise and tenon.
Glued with high solids glue and reinforced with 18 gauge nails, corner blocks and low root woodscrews.

Stain Colors:

A wide range of standard stain colors is available as well as custom color matching. (A surcharge will apply to custom colors.)

Standard Barstool Kick plates are brass. Chrome kick plates are available upon request at the same price.

9-Step Finishing Process:

1. The bare wood of the assembled chair is thoroughly sanded using 100 grit paper.
2. One coat of stain is sprayed onto the entire chair.
3. The stain is hand wiped to ensure an even color and maximum penetration into the wood.
4. The chair is inspected and any necessary adjustments made.
5. One coat of catalyzed sealer is sprayed onto all wood parts to completely seal the wood.
6. Once dry, the sealer is sanded using 280 grit paper.
7. A final sanding is done using Scotch Brite pads to remove any sanding marks.
8. A catalyzed lacquer is sprayed on. This lacquer is very

durable and will stand up in a commercial environment.

9. A final inspection is performed prior to packaging to ensure a high level of quality control.

Note: Specifications are subject to change without notice.
